

Wildan Akbar Putra Nugraha

IT Product Designer Customer-Centric and UI / UX Designer

Jan 2016 - Present (6+ Years Experience)

Website: www.wildanakpn.xyz

Work Experience

Freelance Product Designer UI/UX Designer

Nov 2018 - Present

- Leveraged user research (end-to-end, user-market fit) and design expertise (wireframing, high-fidelity mockups, prototyping) to deliver impactful IT product solutions for global and local clients.
- Enhanced existing websites and applications for individual and corporate clients, ensuring user-centricity and alignment with business goals.
- Conducted comprehensive user research and leveraged design expertise to create user-centric IT products.
- Enhanced existing websites and applications, ensuring alignment with business goals and user preferences.
- Possessed early-stage programming knowledge for efficient collaboration with developers.

Junior Frontend and Web Designer at PT. Sale Stock Indonesia

Jan 2016 - Dec 2017

- At that time it was the first time I was acquainted with the world of software designers, and my main task at that time was to become a website designer who works using Adobe XD and always works using the principles of Software Development Live Cycle to always make improvements and updates on our retail fashion ecommerce platform website at that time.
- Designed and developed user-centric interfaces for websites and mobile applications using Adobe XD.
- Worked with Software Development Life Cycle principles to continually improve and update the e-commerce fashion retail platform.
- Enhanced skills in web development, user experience design, and front-end development.

Project

Revamp Gemini AI Mobile App

This redesign aims to provide a more seamless and user-friendly experience, ultimately transforming Gemini AI into a robust and reliable AI assistant.

Revamp Blu BCA Mobile Banking

The new design enhances user experience with a simplified login process, improved information hierarchy, and better app integration, aiming to increase user satisfaction and retention.

Revamp Shopee with new AI Features

Shopee has redesigned its mobile app to improve product search capabilities with new features such as voice, barcode, and image searches, as well as AI-driven recommendations.
